2 Capital Adequacy and Reconciliation of Regulatory Capital to the Balance Sheet

Explanatory Notes

The following disclosure is made in accordance to the template prescribed in MAS Notice 637 Annex 11E. The column “Amount” shows the amounts used in the computation of the regulatory capital and capital adequacy ratios. The column “Amount subject to Pre-Basel III Treatment” shows the amount of each regulatory adjustment that is subject to the treatment provided for in the cancelled MAS Notice 637 dated 14 December 2007 during the Basel III transition period. Each of these amounts is reported as regulatory adjustments under rows 41C and 56C.

The alphabetic cross-references in the column “Cross Reference to Section 1” relate to those in the reconciliation of the balance sheet on page 2.

MAS Notice 637 specifies which tier of capital each regulatory adjustment is to be taken against. When regulatory adjustments are required against Additional Tier 1 or Tier 2 capital, there are circumstances when the amount of eligible Additional Tier 1 or Tier 2 capital respectively falls short of the amount of regulatory adjustment. Under such circumstances, the shortfall is taken against the preceding tier of capital.

MAS Notice 637 specifies the computation of the amount of provisions that may be recognized in Tier 2 capital. Under the standardized approach for credit risk, general allowances are eligible, subject to a cap of 1.25% of risk-weighted assets.
